AI Narrative Analysis

The model health is concerning due to a single critical finding of severe score drift detected, affecting the model's calibration and rank ordering. This critical issue outweighs the lack of other findings, indicating a potential need for immediate attention.

Key Insights

Severe Score Drift Detected [CRITICAL]

The model score distribution has shifted significantly compared to the baseline. This indicates a structural change in the applicant population or feature inputs, which may invalidate the model's calibration and rank ordering.

Active Alerts

⚠ [WARNING] Calibration Ratio = 1.4797, outside warning range [0.8, 1.25]

⚠ [CRITICAL] Score PSI = 0.2622, exceeds critical threshold of 0.25

⚠ [WARNING] CSI (Debt To Income) = 0.1813, exceeds warning threshold of 0.1

⚠ [WARNING] CSI (Credit Score) = 0.1331, exceeds warning threshold of 0.1

⚠ [WARNING] ROC AUC declined by 0.0364 vs baseline, exceeding warning threshold of 0.03

⚠ [WARNING] Gini Coefficient declined by 0.0728 vs baseline, exceeding warning threshold of 0.05

⚠ [CRITICAL] KS Statistic declined by 0.0637 vs baseline, exceeding critical threshold of 0.05

⚠ [CRITICAL] Approval Rate changed by 0.1964 vs baseline, exceeding critical threshold of 0.1
